

ReFirme™

ReFirme is an FDA cleared non-invasive Skin Tightening procedure featuring the revolutionary elōs™ technology that enables you to comfortably achieve a more youthful, toned and lifted appearance without enduring downtime.

ReFirme is a complete anti-aging solution for targeting those telltale signs of aging, including neck laxity, sagginess under the eyes, and nasolabial folds.

Unlike conventional laser skin tightening treatments that are time and treatment intensive, and often too painful for many patients, ReFirme offers virtually painless and fast treatment for sagging and wrinkled skin. Look as young as you feel!

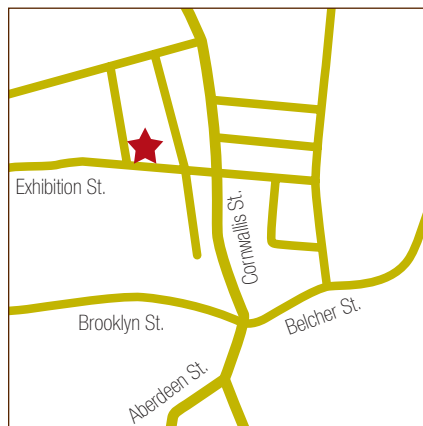

VelaSmooth™

Finally, Proven Cellulite Treatment

More than 80% of women over the age of 20, regardless of their weight or size, are affected by cellulite, characterized by pitting, bulging, and deformation of the skin.

Now, there is a proven, medical solution! Valley Medical Aesthetics is proud to offer VelaSmooth, a class IIA medical device. It's the first non-surgical, non-invasive, no down time cellulite reduction system that is FDA cleared.

It is completely safe and has proven to be effective in reducing the appearance of cellulite and re-contouring problem areas.

Our Team

Our team consists of two Vascular Surgeons, a Vascular Radiologist, a Certified Ultrasound Technologist, a Vascular Nurse, Certified Compression Stocking Fitters, Certified Laser Technicians, and a Master & Clinical Aesthetician.

Leg & Facial Vein Treatment

Diminish Problem Veins

We are proud to offer elös, the first and only technology that uses combined energies to effectively and gently reduce the appearance of problem veins on the legs and face. Elös is truly the next generation of safe and effective vein treatment technology.

Skin Renewal

Look And Feel Young Again

Over time, skin begins to display the effects of aging. Factors such as chronic sun exposure, lifestyle choices and environmental factors can speed up the aging process significantly.

Now you can safely and quickly fade age spots, spider veins, rosacea and uneven skin tone due to sun damage.

Only elös combines radio frequency and light energies to gently and precisely target problem areas. The end result is clear, youthful looking skin. Restore your skin to a healthy state with elös skin renewal treatments.

Endovenous Laser Treatment

EVLT® the laser alternative to vein stripping

EVLT® is a quick, minimally invasive laser procedure that leaves no scar and can be performed in our office. The treatment takes less than one hour.

Our procedure uses targeted laser energy to seal the vein shut and help you look and feel better fast.

Sclerotherapy

Diminishing Unsightly 'Spider Veins'

Millions of women are bothered by spider veins—those small yet unsightly clusters of red, blue or purple veins. Achieve clear, youthful skin and be more confident in your appearance. Sclerotherapy treatments are performed by Valley Vascular Associates with the assistance of the Ultrasound technologist if required.
